

SLT-3 Modular Cable Tester (MODTAP)

- Our most popular tester
- Two pieces for installed testing

Unique snap-together two piece design allows for testing installed cables easily. The Master unit applies a test voltage to the pairs of either 568A, 568B or USOC 4 pair cables. The Remote unit then displays the corresponding green (straight through) or red (crossed over) results on its LEDs. No lights indicate open pair. 9V battery included. One year warranty.
